

COMFORTFLEX

This fabric offers a natural, easy stretch that moves with the body for effortless comfort. Ideal for everyday wear where softness and flexibility matter most.

POWERFLEX

Engineered for performance, PowerFlex provides enhanced elasticity and shape retention. Perfect for active or form-fitting garments that demand dynamic movement and lasting structure.

VERTICALFLEX

This fabric offers stretch in the vertical direction, providing extra comfort and better fit for garments that require lengthwise flexibility.

BISTRETCH

Stretch in every direction, vertically and horizontally, for ultimate flexibility and freedom. Bistretch fabrics adapt to the body's movement, offering unmatched comfort and versatility.

MULTISTRETCH

Exclusive to jersey/knit fabrics, offering stretch in every direction. Ensures unrestricted movement and exceptional flexibility.

JERSEY/KNIT

Defined by a soft touch, natural elasticity, and relaxed feel. Follows the body's movement naturally for everyday comfort and ease.

PRINT

Designs applied directly onto the fabric surface for a wide range of colors and creative expressions. Adds character, identity, and visual impact to garments.

TRANSFER PRINT

This technique uses heat and pressure to transfer high-resolution designs onto fabric, allowing for vibrant colors and sharp details. Ideal for expressive prints with precision and personality.

NATURAL

This items focus on the inherent qualities of natural materials. Fabrics containing natural fibers deliver an authentic, timeless feel with exceptional quality.

ECOSOUL

Produced with conscience, EcoSoul fabrics are made from recycled or sustainably sourced materials. A step toward a cleaner Planet, without compromising beauty or quality.

EUROCRAFT

Proudly crafted in the Europe, this fabric reflects the region's high standards of quality, craftsmanship, and ethical production. A refined choice with traceable origins.

FUSIONFABRIC

Fabrics bonded together to enhance structure, stability, and body. The result is a smooth, compact surface with excellent shape retention and a clean, modern look.

WETGUARD

This water-repellent finish creates a protective barrier against light rain and splashes, while remaining PFAS-free for a cleaner impact. Soft, functional, and safe for both you and the planet.

DIRTSHIELD

Resistant to everyday dirt and stains all without PFAS, DirtShield extends the life and cleanliness of garments. Practical performance consciously developed. A smart choice for office, outerwear, kidswear, and travel essentials.

AIRFLOW

A breathable structure designed for optimum airflow and wearer comfort. AirFlow keeps garments feeling fresh and light, even through long hours of use and high humidity.

HYDROCOOL®

An advanced moisture and heat management system that moves perspiration away from the skin for rapid evaporation. Creates a natural cooling effect and lasting comfort.

WASHSERIES

Air Wash softens the fabric using a specialized AERO machine for a lighter, smoother handfeel. Sand Wash creates a distinctive visual effect through washing with sand, adding character and depth. Bio Wash uses enzymes to remove surface fibers, resulting in a cleaner, smoother appearance and softer touch.
